HokieMart Upgrade 23.2 – Effective July 17th 2023

1. **<u>Document button updates:</u>** The sidebar display settings have changed on all documents (requisitions, purchase orders, receipts, invoices, etc.).

   a. The show sidebar icon has now changed to an arrow . This button's functionality to hide the sidebar and reopen it remains the same.

   b. Filter View settings on documents have been updated so that the options that were last selected now remain in place, even if a user navigates away from the page and returns.

   c. The save changes, close, toggles, and other icons seen at the top right of HokieMart documents have all become darker and more easily visible.

      - buttons ()
      - toggles (), and
      - icons ( )

2. **<u>Approval Page updates:</u>** In the filter views, there is a new compact view for approvers on their queue. Additionally, the checkmark has been replaced with an Approve button.

   a. A new **Compact View** filter option displays the records with condensed spacing, so more records are displayed on the page.

   b. Previously, a checkmark indicated a document was ready to be approved. This has been replaced with an “Approve” button.

   c. Additionally, users can now click anywhere on a folder row to expand and collapse the folder and the latest selection is saved. The color of the Approvals folder rows has also been updated.
