

Automated External Defibrillators (AEDs)

The Virginia Tech Rescue Squad (VTRS) administers [Virginia Tech Policy 5450](#) on Automated External Defibrillators (AEDs).

Departments must contact [VTRS](#) to inquire about purchasing an AED. You may also contact [the campus AED coordinator](#) to request a form.

The AED Coordinator will contact the end user to discuss the requirements for the AED purchase. Once approved, a Public Access AED Departmental Approval and Ordering Information memorandum will be provided. Please attach the memorandum to the requisition in HokieMart to confirm VTRS is aware of the purchase so the AED is added to their master inventory list.

For more information, contact [Procurement](#), 540-231-6221, or [the HokieMart help desk](#).
